September 19 – 22, 2013
Athens, Greece**

An Interactive Course in Diagnostic Imaging

Download the IDKD Greece [Preliminary Program](#)

Further information is available on our website: www.idkd.org
Registration will open in early April 2013.

IDKD is presenting workshops and lectures. During workshops, discussing the medical imaging approach to the diagnosis of important diseases, participants are divided in groups. After a brief introduction to the subject they study the case material presented by the instructors. The case-viewing is performed by a special software, uniquely developed for IDKD and drawing from the extensive expertise with electronic teaching, accumulated by IDKD over the last years. Finally, the instructors guide through the cases, discuss different diagnoses, present additional material and ask pertinent questions to the participants.

Highlight- and Special-lectures, presented daily by senior experts on “hot topics”, new developments in radiology and associated sciences will complete the scientific program.

In **Hong Kong** and **Greece**, IDKD is offering intensive courses, spread over 3 ½ days, featuring 14 workshops and highlight lectures.

For further information and registration, please consult our website
www.idkd.org

We look forward to welcoming you to one of our forthcoming courses in Davos, Hong Kong or Greece!
